

176.318 **RL** CONNEX

CX195-20 RJ45 to RJ45 CAT6A Data Cable 20.0m

The CX series Data Cables are ideal for hassle-free connectivity in both analog and digital realms. These cables are designed to interconnect and patch devices within a network effortlessly. Constructed with precision, the cable features four twisted pairs of wires, protected by both tin-plated braiding and foil insulation. This design effectively prevents disturbances and interference. Each end is equipped with a CAT6 E-CON RJ45 connector, ensuring reliable connections. Plus, the PVC cable jacket provides flexibility, allowing the cable to bend and adapt easily to various setups.

Product colour : Black
Select both plugs : RJ45
Lead length : 20m
